Installations of ENTEX Products

Ciales, Puerto Rico

In the fall of 2009 Entex was chosen as the IFAS system supplier for the Ciales Wastewater Treatment Plant and Dos Rios Pump Station. The project consists of a new Pretreatment Facility and a complete retrofit to a BioPortz Moving Media System for nitrification and Carbon Oxidation. Entex’s scope of supply includes media, media retention screens, aeration system, anoxic mixers, and a SCADA system. Construction began in early 2010.

Media Installed
3,900 ft³ of BioPortz Moving Media will be installed during Phase 1 of the project
